Palomino Reserve_Open Space Case Study

1) Design accommodates a variety of activities (kickabout, play, relaxation, social gathering)
2) Furniture with inclusive access, located for natural surveillance
3) Shelter to provide shade; encourage longer stays and social interaction
4) Garden bed planting to help guide visitors and add a sensory element
5) Seating on cement pad to allow inclusive access with space for prams, wheelchairs etc
6) Clear pathways free from obstructions
7) Public art leaf imprints in concrete
8) Different surface treatments that align with the function of the areas and their intended use
9) Tree plantings to provide future tree canopy shade
